

Population served, by letter grade

■ A ■ B ■ C ■ D ■ F

Population served by water systems by letter grade. In the callouts, the first number is the total population served by systems that earned that letter grade, and the second number is the statewide percent of population served by systems that earned that letter grade.

Example: There are 248,058 persons served by systems that earned a grade of B, which equals 5% of all persons served by community public water systems in the state.
